

WEK Industries POLYFLOAT™ & POLYFLANGE™

10-YEAR WARRANTY AGREEMENT

WEK Industries warrants **POLYFLOATS™** and **POLYFLANGE™** floats for ten (10) years from failure in normal, proper and intended use as dock floatation devices, against water logging, cracking, peeling, storm damage and damage from wildlife and/or losing beads.

Any **POLYFLOAT™** or **POLYFLANGE™** float that fails because of workmanship is warranted for a period of 1 year. Obligation under this warranty extends to replacement of defective goods only. **WEK Industries** assumes no obligation for and will not pay for any labor, equipment use or any ancillary costs associated with the removal and replacement of defective floats.

Replacement floats will be shipped and billed to customer. Credit for defective floats will be issued upon receipt of returned goods. Credit for freight charges will be issued after inspection of returned floats, and after determination of cause of failure.

If the Buyer and **WEK Industries** disagree regarding the reason for failure, then they shall seek a technically competent third party skilled in the use and fabrications of the materials involved and shall ask his determination of the source of failure. His determination shall be binding on both parties, and they shall abide by it. This third party procedure shall not be used for isolated, one-time failure, but only in the event a major failure trend develops. Expenses of third party determination shall be borne by the party that is determined to be liable for the replacement.
